## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: the cited prior art, most notably US Patent 6,526,215, fail to teach the limitations submitted in the amendment to the claims dated 25 February 2005. While Hirai teaches a system capable of creating synthetic key frames similar to that of Applicant's claim 1, Hirai and the cited prior art fail to teach the limitations of extracting text regions from a news video stream, identifying the extracted text regions by a type selected from a plurality of types, giving weight to each text region based on the region identification, and generating a synthetic key frame by including text regions of at least a certain importance measure. A major difference between Hirai and claim 1 is Hirai's failure to teach the extraction of text regions taken from the video stream, as noted by Applicant in pages 12-13 of the remarks dated 25 February 2005, and the subsequent identifying and allocating of weights to the extracted text regions. Independent claims 13 and 21 disclose limitations similar to those deemed allowable in claim 1, and are thus deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
